

Appln. No. 10/559,805
Amendment dated December 22, 2006
Reply to Office Action mailed June 27, 2006

ABSTRACT

The device includes supporting arms (3) and a connecting mechanism (5,6) mounted at an end (30) of each supporting arm (3) in order to receive a transverse rod (7). The connecting mechanism (5,6) includes an adaptor (5), which is to be placed on the end (30) of the supporting arm (3), and an elastic insert (6), which is to be placed on the adaptor (5).
